Facial Oil Recipes for Oily Skin

Four simple blends | 100 g batches | All weights in grams

#1 Everyday Oiliness

For everyday shine, with a light finish.

Hazelnut Oil	39.75 g
Jojoba	30 g
Thistle Oil	30 g
Rosemary Antioxidant	0.25 g
Total	**100 g**

Optional infusion: Hazelnut + Jojoba + Thistle.
Weigh **99.75 g** after straining and cooling.

#2 Congestion and Occasional Blemishes

For blocked pores and the occasional spot.

Thistle Oil	44.5 g
Jojoba	25 g
Hazelnut Oil	20 g
Kiwi Seed Oil	10 g
Rosemary Antioxidant	0.5 g
Total	**100 g**

Optional infusion: Thistle + Jojoba + Hazelnut.
Weigh **89.5 g** after straining and cooling.

#3 Oily but Uncomfortable

For skin that feels tight or dry despite the shine.

Thistle Oil	39.5 g
Jojoba	35 g
Kiwi Seed Oil	15 g
Borage Oil	10 g
Rosemary Antioxidant	0.5 g
Total	**100 g**

Optional infusion: Thistle + Jojoba.
Weigh **74.5 g** after straining and cooling.

#4 Mature Combination Skin

For an oily T-zone and cheeks needing more care.

Jojoba	39.75 g
Hazelnut Oil	30 g
Rosehip Seed Oil	20 g
Borage Oil	10 g
Rosemary Antioxidant	0.25 g
Total	**100 g**

Optional infusion: Jojoba + Hazelnut.
Weigh **69.75 g** after straining and cooling.

Making and using your blend

1. Use clean, completely dry equipment, bottles and scales accurate to 0.25 g.
2. Weigh the oils, add Rosemary Antioxidant and stir thoroughly. No heating is needed for plain blends.
3. Bottle, close and label with the blend name, ingredients and date.
4. Apply sparingly to clean, slightly damp skin; use less on oily areas. Avoid cuts and broken skin.

With cannabis: Prepare extra infusion in the recipe proportions to allow for oil retained in the plant material. Weigh the cooled amount shown in your panel, then add the remaining ingredients to make 100 g.

Looking after it: Keep water out. Store tightly closed, cool and away from sunlight. Try a small area first; stop if irritation occurs. Blends #1, #2 and #4 contain Hazelnut Oil: avoid with hazelnut allergy.

Antioxidant: These weights refer to the specific Rosemary Antioxidant extract used in the article. It slows rancidity; it is neither Rosemary Essential Oil nor an antimicrobial preservative. Blends #1 and #4 use 0.25 g; #2 and #3 use 0.5 g for extra protection of delicate, oxidation-prone Kiwi Seed Oil.
